

EARTH PARADISE ABUNDANT ECONOMY

A God Driven Movement for Eradicating Personal Taxation, Restoring Natural Freedom, and Implementing a Consumer-Funded Universal Basic Income (UBI) Rooted in the Three Pillars of the Global Humanity Economy

Author: Thierry Été | **Date:** September 2026

Executive Summary

Modern civilization is built upon a fundamental contradiction: Humanity was born into an abundant natural commons—endowed with free access to the elements, land, shelter, and bodily autonomy—yet contemporary legal and economic systems have enclosed these resources, transforming existence into a taxable offense. Personal income taxation penalizes human labor while subsidizing structural scarcity.

This God Driven Movement outlines a structural paradigm shift under the banner of Earth Paradise Abundant Economy.

By dismantling personal income taxes, implementing a low-friction consumer-backed transaction and consumption levy across the 85% consumer-driven GDP, and anchoring the movement to the Three Pillars of the Global Humanity Economy, sovereign nations can fund a universal, unconditional Sovereign Dividend (UBI) while establishing timeless spiritual accountability, currency stability via DIGIGOLD, and female financial leadership.

Crucially, by integrating continuous AI-driven social orientation at all levels of society, where societies act like gardeners, investing “water” into future growth, citizens are guided from youth to develop their unique 'fruit tree' potential, following what they adore, naturally generating highly specialized, soul-infused attractive products and services that amplify consumer demand and drive exponential GDP growth.

1. The Philosophical Foundation: From Enclosure to Natural Sovereignty

1.1 The Baseline of Natural Freedom

By birthright, human beings inhabit a free paradise on Earth. Nature provides an unconditional baseline for survival:

- **Sustenance & Elements:** Free access to fruit trees, pure water, natural sunlight for essential biological synthesis (Vitamin D), and natural warmth through fire.

- **Bodily Autonomy:** The unhindered right to physical movement, skin exposure, and real-time biological relief without regulatory or spatial tolls.
- **Natural Shelter & Motivation:** Access to natural shelters and the intrinsic human drive to maintain physical health, vitality, and meaningful community bonds.

1.2 The Enclosure of Existence

Historical socio-economic evolution replaced this natural freedom with property-based enclosure. Common lands were privatized, resources were monopolized, and human survival was made conditional upon monetary exchange. Under the current paradigm, an individual must rent their right to exist on Earth, trading their life force through labor just to pay taxes to the very system that enclosed their birthright.

1.3 The Fallacy of Personal Income Tax

Personal income tax is a structural penalty levied on human effort, focus, and heart beats wasting. It treats human beings as corporate assets or revenue streams of the state rather than free sovereigns of the earth.

It has a discouraging psychological effect slowing down consumption and therefore GDP. It encourages poverty, suffering, self-destructive compensations and dishonesty.

To achieve true liberty, personal taxation must be abolished entirely, and the social contract must be rewritten to treat economic participation as a shared benefit rather than a taxable liability.

2. The Three Pillars of the Global Humanity Economy

To ensure that the Earth Paradise Abundant Economy is built upon an unshakeable, righteous, and sustainable foundation, the movement is governed by three immutable pillars, deeply intertwined with human social orientation and creative expression:

Pillar 1: Timeless Soul and Emotional Accountability

As Timeless Souls blessed with the opportunity to incarnate into temporal bodies, our ultimate objective of life is to purify ourselves—one act of love at a time—and clean the negative emotions stored in our souls during past lives.

Our core Soul Mission, the work we were sent to do, is to contribute to the reestablishment of Paradise on Earth, following our Soul Destiny protected by above, choosing our direction, with our free-will, to give our adorable fruits to the creation, one act of love at a time, one attractive fruit at a time.

By developing an abundant economy restoring the creation free access to basic needs, and encouraging a transition to a vegetarian diet, promoting fruit trees all over our planet, we insure our generations to enjoy a clean and abundant earthly home for our bodies, and for the future generations of timeless souls to incarnate and free-willingly spending their heart beats to purify, **LOVING THEIR NEIGHBOR AS THEIR**

SOUL, ONE HEART BEAT AT A TIME, ONE ACT OF LOVE AT A TIME, ONE TIMELESS SOUL AT A TIME, through their divine mission in the perfect paradisiac environment.

Economic and social systems must reflect this spiritual reality, replacing greed and exploitation with empathy, sharing, love, and harmonious stewardship based on the paramount principle of 'LOVING OUR NEIGHBOR AS OUR SOUL'.

Pillar 2: The DIGIGOLD Evaluating Currency

To protect citizens from fiat currency devaluation, inflation, and systemic wealth extraction, we must institute an evaluating currency like DIGIGOLD in place.

Backed by real value, DIGIGOLD stabilizes purchasing power, shields the UBI dividend from monetary erosion, and maximizes consumer confidence and spending velocity across the economy as specialized, soul-fueled offerings proliferate.

DIGIGOLD is already accessible to Humanity via crypto currencies like PAXG or USDG backed up by gold, spendable via crypto Visa card to purchase Humanity's daily bread.

Pillar 3: Female Financial Leadership

We need to make sure the female half of Humanity manages the finances and budgets of Humanity. Women embody long-term community resilience, nurturing stability, and prudent resource allocation investments.

Placing fiscal governance in female hands ensures budgets prioritize human well-being, ecological harmony, and generational security over short-sighted speculation, expertly nurturing the societal orientation of human potential.

3. The Economic Architecture: The Consumer-Funded UBI Model & Specialized Growth

Current fiscal policies fail because they rely on regressive income extraction and complex tax compliance structures. The alternative is an economic engine anchored on macroeconomic velocity, consumption, and continuous orientation toward specialized human excellence.

3.1 The 85% Consumer-Driven GDP Reality

Consumer spending constitutes the vast majority (approximately 70% to 85%) of national Gross Domestic Product. Under the Earth Paradise Abundant Economy model, AI-driven social orientation at all levels guides individuals to cultivate their unique talents from a young age. As citizens specialize into their 'fruit tree' potential, they naturally generate an endless array of bespoke, highly appealing ('sexy') products and services. This explosion of hyper-specialized, soul-infused offerings naturally stimulates consumer desire, increases market velocity, and organically multiplies GDP turnover.

3.2 The Revenue Mechanics

To replace personal income taxes and fund an unconditional UBI under the Earth Paradise Abundant Economy framework:

- **Total Abolition:** Complete, permanent elimination of personal income taxes, payroll taxes, social security worker contributions, and capital gains taxes on primary earners.
- **The Sovereign Consumption & Transaction Levy (SCTL):** Implementation of a low-rate, automated, transparent clearing levy applied across high-volume commercial transactions and corporate revenue flows, fueled by the soaring volume of specialized consumer exchanges tracked via DIGIGOLD standards.
- **Scale Over Extraction:** Because economic velocity across the entire consumer market is massive—supercharged by specialized offerings born from universal social orientation—a micro-percentage levy generates a revenue pool vastly larger and more stable than traditional income tax collection.

3.3 The National Commons Fund & Dividend

- **The Fund:** Revenue generated via the SCTL flows directly into an un-manipulable, transparent National Commons Fund managed under female fiscal leadership.
- **The Distribution:** The fund is distributed equally as a monthly digital Sovereign Dividend (UBI) in stable value units to every verified legal resident and citizen.
- **The Feedback Loop:** By guaranteeing basic survival, citizens are free to pursue their specialized fruit tree development and reputation. The resulting bespoke goods and services ignite consumer spending, driving up GDP turnover and naturally sustaining the fund without burdening human labor.

4. Strategic Legal & Policy Roadmap

Phase 1: Intellectual & Spiritual Dissemination — Encouraging the Earth Paradise Abundant Economy Movement, highlighting emotional soul accountability, universal social orientation, and establishing ideological legitimacy.

Phase 2: Grassroots Advocacy & Currency Pilot — Collaborating with existing global movements advocating for personal tax eradication while piloting DIGIGOLD exchange frameworks, AI orientation academies, and female-led community budgeting.

Phase 3: Legislative & Constitutional Reform — Mobilizing grassroots coalitions around a unified constitutional amendment to abolish personal income tax, institute the Sovereign Dividend, and mandate universal social orientation and female financial governance.

5. The Renaissance of Human Purpose: Universal Social Orientation & The 'Fruit Tree' Economy

Establishing a guaranteed Universal Basic Income backed by GDP Abundance and anchored in the Three Pillars unlocks the true evolutionary destiny of Humanity.

When survival is no longer tied to exhausting, depressing repetitive survival jobs destined to be automated by AI and robotics, human beings are liberated from the mechanical treadmill of modern wage slavery.

5.1 From Survival Labor to Unique Fruitfulness

Just as a natural fruit tree does not stress, calculate, or struggle to produce its attractive sweet fruits designed to motivate consumers to spread its seeds DNA and reputation, while feeding the carriers, human beings are born with an innate, unique spiritual and creative design serving Humanity.

As timeless souls fulfilling our mission on Earth, we reestablish Earth Paradise by spreading our own reputation via the adorable soul fueled products and services we give to Humanity, and by planting fruit trees all over the planet via consuming the best fruits, promoting the cultivation of fruit trees, encouraging a vegetarian diet, and giving creation abundant access to nutrients and clean water.

Freed from the burden of basic survival, every individual can concentrate their heart beats and reputation, from a very long age, on cultivating the specific 'fruits' and unique 'DNA' they were born to offer to the world.

5.2 AI-Driven Social Orientation at All Levels

To ensure that this potential is fully realized, social orientation is integrated at all levels of society. Education and career development undergo a profound metamorphosis driven by advanced AI mentors:

- **Early & Continuous Guidance:** AI-driven social orientation systems operate at all levels—from early childhood through adulthood—continuously reinforcing and guiding each young 'fruit tree' to discover and refine its specific gifts.
- **Specialized Mastery:** By continuously aligning education with natural human passions, society ensures that every citizen masters their unique creative calling and Soul Mission, with precision and joy.

5.3 Cultivating 'Sexy', Specialized Offerings to Maximize Consumption

As universal social orientation guides citizens into their ultimate mastery, humans naturally develop an infinite variety of specialized, highly appealing ('sexy'), and soul-infused products, arts, experiences, and services.

These offerings—fueled entirely by love, adoration, and the deep desire to serve one's neighbor—naturally increase consumption because they are tailored precisely to individual consumer desires.

5.4 The Exponential GDP Growth Engine

This proliferation of bespoke, specialized human creations consumed joyfully through specialized decentralized marketplaces and DIGIGOLD-backed platforms creates an unprecedented economic multiplier. By matching unique human fruits directly with consumer needs, market turnover surges organically, proving that universal orientation and love-driven specialization are the ultimate engines of sustainable GDP abundance.

6. Digital Movement Structure: Execution Plan

To scale the Earth Paradise Abundant Economy Movement globally and build an unignorable political force, the Movement requires a synchronized digital architecture across web, video, community platforms, and direct action.

Movement Pillar	Core Components & Execution
1. The Digital Core	thierryete.com / globtradin.com Infrastructure: Hosting Earth Paradise Abundant Economy Movement White Paper, Soul Accountability Essays, AI Social Orientation Portals, & DIGIGOLD access promotion.
2. Multimedia & Narrative	Short-form video series ('The Stolen Paradise'), AI-produced musical anthems on YouTube, and vector infographics on Fruit Tree Economics.
3. Community Hub	Decentralized coalition network led by female financial stewards, and secure links to women organizations portals.
