GOING BACK HOME PURIFIED BY

LOVING OUR NEIGHBOR AS OUR SOUL

ONE ACT OF LOVE AT A TIME

PREFACE

You received this text, because of your special power, position and ability to change the world and make it ONE. A world of unique individuals with a common goal: **LIVING IN A BEAUTIFUL PARADISE ON EARTH FOR ALL**.

It will show you how Humanity is a species organized in a way that follows the same structure you can find at all levels of life in the Uni-Multiverse, and where every single part has a specific function and role to play for the survival of the entire organism. In the same way that an Ant colony has individual ants born to play a specific role necessary for the survival of the entire colony, (nurse, soldier, laborer, and queen), the Humanity organism is made of humans, (humanity cells) who are born with specific talents that play a key role in the global economy of the entire species.

You will see that this specificity can be reduced to 7 types of humans and **abilities** (The Financial, the Marketer, the Producer, the Manager, The Sales Rep, the Recruiter and the Missioner) but of course with infinity of variations and uniqueness.

Everyone is born with their specific abilities (their natural forte) defined by what they **ADORE** the most in life.

The only way to have a world of peace and love that strives and where everyone is excelling in what they are best at… is to have structures and processes that help recognize from young age what these abilities are, and direct youth into the proper education that will develop the skills of future generations of professionals.

Orientation then Education leads to booming economies where products and services are offered by passionate people who **ADORE** their jobs and amazed consumers who adore their products and services in return.

Thank you for taking the time to read this text and adapt its knowledge to your own life organization and impact the life of Humanity for the generations to come.

I wish you a very blessed and loving soul journey on your destiny back home.

REMINDER

Life as a Refinement Process (The Soul Purification)

We do not enter this physical world as pure souls; we come here carrying the frequencies of our past, emotional impurities, and lessons that we must work through. It is only by incarnating and, with each **"priceless heartbeat"**, spreading emotions all around us, that we are **"blessed with the opportunity"** to cleanse the impure emotional energies stored within our soul.

By navigating our destiny through the challenges presented to us and consciously choosing, through our free will, to spread pure love, we cleanse the impure energies of hate, revenge, and selfish compensations fueled by faithless fears and disconnection from God, accumulated during our past lives, and thereby refine the frequency of our soul.

"One Act of Love at a Time"

To love "**one act of love at a time"** is fundamental to the purification of our soul. Raising and refining our frequency is not accomplished through one great, overwhelming leap. Rather, it is achieved through the countless small choices we make each day.

It is the smile we offer when we are tired, the patience we show when we are frustrated, the forgiveness we extend when we have been hurt, and the constant practice of the divine commandment to "**love our neighbor as our soul"**. Each act of love is a subtle adjustment of our inner frequency, gradually refining the vibration of our soul and bringing us into ever-greater harmony with God.

The Timeless Harvest

During our lifetime incarnated, we are **"harvesting the emotional love"** felt by those who received our acts of love, and that we will feel timelessly after we leave our lifeless physical body behind. In the physical world, we collect material possessions that remain behind when our body dies. But in reality, the only true value we carry with us is the emotional resonance of the love we have given to those around us throughout our incarnated destiny, which we have harvested within our soul.

Because love is energetic, it does not decay. During our incarnation, we do not fully feel the emotions we spread around us. But when we step beyond the limitations of time and the physical body, we feel them all… timelessly. In that state, one second can feel like an eternity, as we simultaneously experience the emotions we gave and all the repercussions they generated, immersing ourselves at once in the emotional frequency we spent a lifetime adjusting.

We are, quite literally, building our timeless home from the emotions we freely choose to cultivate throughout our journey in a physical body. **"It is not the emotions we received that are embedded in our soul… it is the ones we gave."**

This understanding gives the incarnated soul experience a profound meaning. We are not simply passing through existence; we are **"heartists of emotions,"** consciously using our free will to create, tune, and harmonize the emotional masterpiece frequency of our soul, while preparing ourselves to **"feel it fully and timelessly"** when our time has come.

INTRODUCTION

The most important discovery of Humanity is the notion of **ONE**. Humanity started to develop by grouping individuals together in functional organizations where everyone worked to achieve the common goal of the group: **SURVIVAL**.

The spiritual notion of one God changed forever the relationship that we have with the infinite Cosmos and each other, and has made us feel that we are all part of this "ONE".

This notion of ONE reflects the symbiotic aspects of nature. All species are interdependent. While they compete with each other, they tend to balance their destructive power to maintain a global equilibrium necessary for their personal eternal survivals while all having a common goal: **MAINTAINING LIFE**.

In other words, all lives try to find their way to live as long as possible.

How are we attempting to achieve this ambitious goal?

- By having the **common spiritual goal** of respecting our body made to the image of a model of architecture and organization common in nature. **(Mastering Energy)**

- By using and **respecting our body cycles** to follow and adapt to the rhythm of our ecosystem. **(Mastering Time)**

- By **adapting genetically everywhere** on Earth in our specific continental habitat. **(Mastering Space)**

Mastering Energy, Spirit and Function

THE DIVINE MISSION AND ITS TOOL

A tool for each divine mission and each divine mission with its tool

Everyone born on this planet experiences instinctively the **7 functional systems** that constitute our organism by doing the basic actions that maintain our life:

Breathing

Eating

Moving

Loving

Reproducing

Thinking

Resting

Each of these activities characterizes a system of our organism:

The Respiratory System (Energy collection)

The Digestive system (Energy production)

The Musculoskeletal System (Movement)

The Cardiovascular and Lymphatic Systems (Energy distribution)

The Uro-Genital system (Reproduction and Restoration)

The Central Nervous System (Voluntary action)

The Integumentary System (Skin: Protection and Energy/Fat/Sugar Storage)

The human embryo is constituted of **3 layers** that will develop **each 2 or 3 systems** of the body:

ENDODERM (Interior layer)

Respiratory System + Digestive System

MESODERM (Middle layer)

Musculoskeletal System + Cardiovascular and Lymphatic Systems + Uro-genital System

ECTODERM (Exterior layer)

Central Nervous System + Integumentary

It is interesting to observe that the Cardiovascular and Lymphatic Systems are at the center/middle of the complete organism.

The common objective of these different systems is to work together to collect food and transform it into life.

There are **2 phases** to complete this goal:

- **A Masculine Phase of Production**
- **A Feminine Phase of Reproduction**

The Production phase will bring the food (for the group and the individual.)

The Reproduction phase will bring the energy to restore the individual and reproduce the group.

Each phase has itself 3 steps/functions to accomplish their goal:

1. **A source of energy**
2. **A tool**
3. **A director**

For the **Masculine Phase of Production** with its goal of bringing food:

1. **The Pulmonary system is the main source of energy.**
2. **The Main tool for acting is the Musculoskeletal System.**
3. **The Director is the Central Nervous System.**

The product of this phase is: **FOOD**

For the **Feminine Phase of Reproduction** with its goal of reproducing the species and the individual (restoration):

1. **The Digestive System is the main source of energy**
2. **The Uro-genital System is the reproductive tool**
3. **The Integumentary System is the Director (it is the one stocking the energy)**

The product of this phase is: **LIFE**

The Cardiovascular and Lymphatic Systems which are at the center/middle of the organization are participating to each step of the 2 phases and are translating the 2 goals achieved by a feeling of well-being, health and accomplishment.

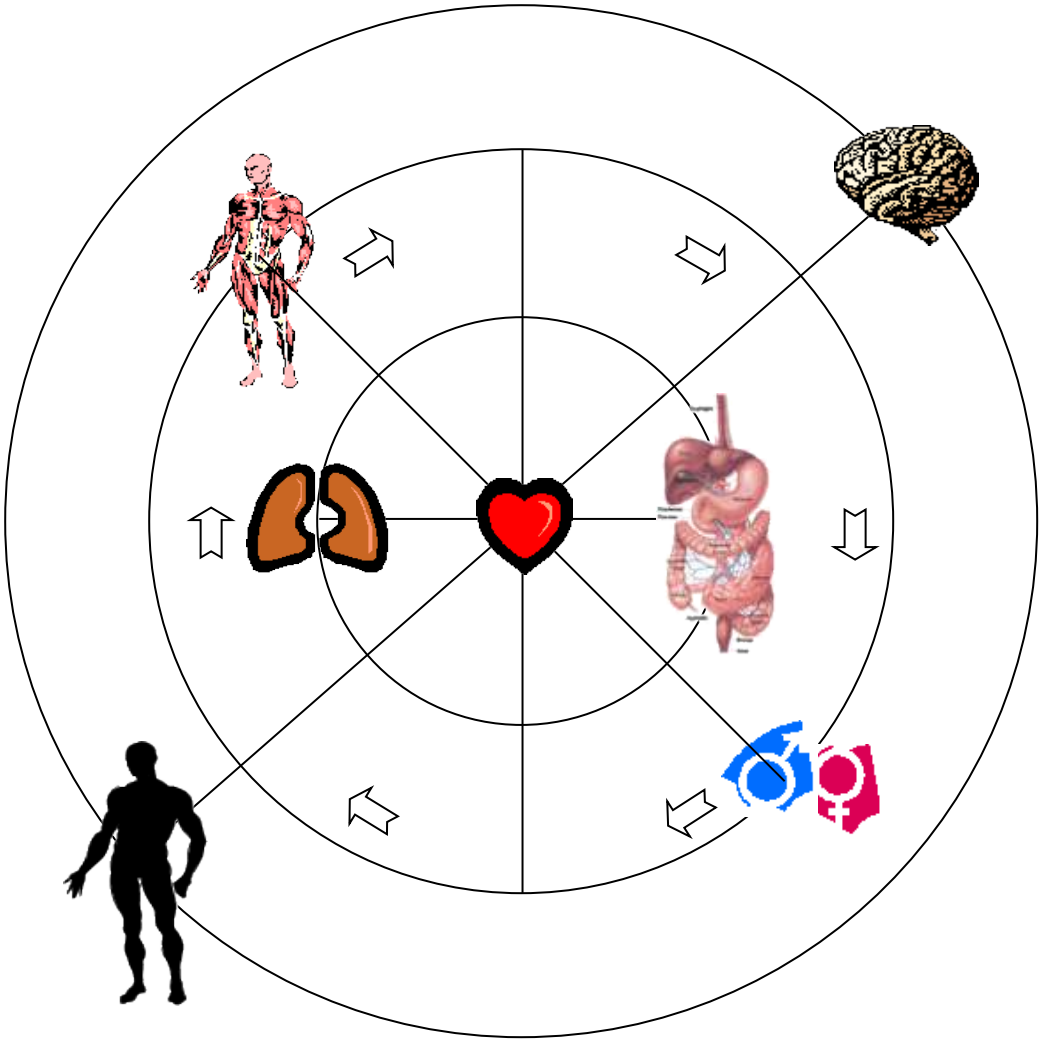

The Cardiovascular system supply the energy necessary to produce food and carry the energy resulting from the food transformation, to be stocked and used to restore the body (and reproduce the species.)

The Cardiovascular system overall transform life in food (production phase) and food in life (reproduction phase) by carrying the energy to achieve both goals.

ENERGY + TOOL + DIRECTOR = PRODUCT

REPRODUCTION / LIFE

Mastering Time, Love and Free-will

THE CREATIVE HEART

A time for each creation and each creation in its time

As soon as a new life is entering our ecosystem, it is in contact with its cycles of activity. For example:

- **The cycle of days and nights**
- **The cycle of warm and cold**
- **The cycle of seasons (food production)**

These major cycles are resulting from the combination of activities of the different elements that constitute the ecosystem we are living in.

There are 7 elements:

- **Atmosphere**
- **Earth**
- **Gravity Force**
- **Oceans**
- **Moon**
- **Sun**
- **Space**

Each of these elements plays its role in the development of life and creates specifically one of the **7 systems** that make up our body.

ENDODERM:

The Atmosphere creates our Respiratory System (By the oxygen it contains)

The Earth creates our Digestive System (By the food its bears)

MESODERM:

The Gravity creates our Musculoskeletal System (By the weight stress it produces)

The Oceans create our Cardiovascular and Lymphatic Systems (By the water it contains)

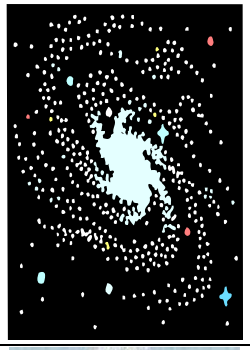

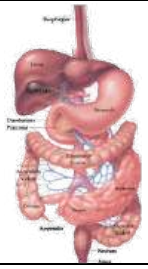

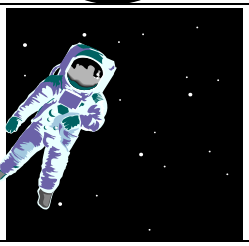

The Moon creates our Uro-Genital System (By the Tides activity and fecundation cycle)

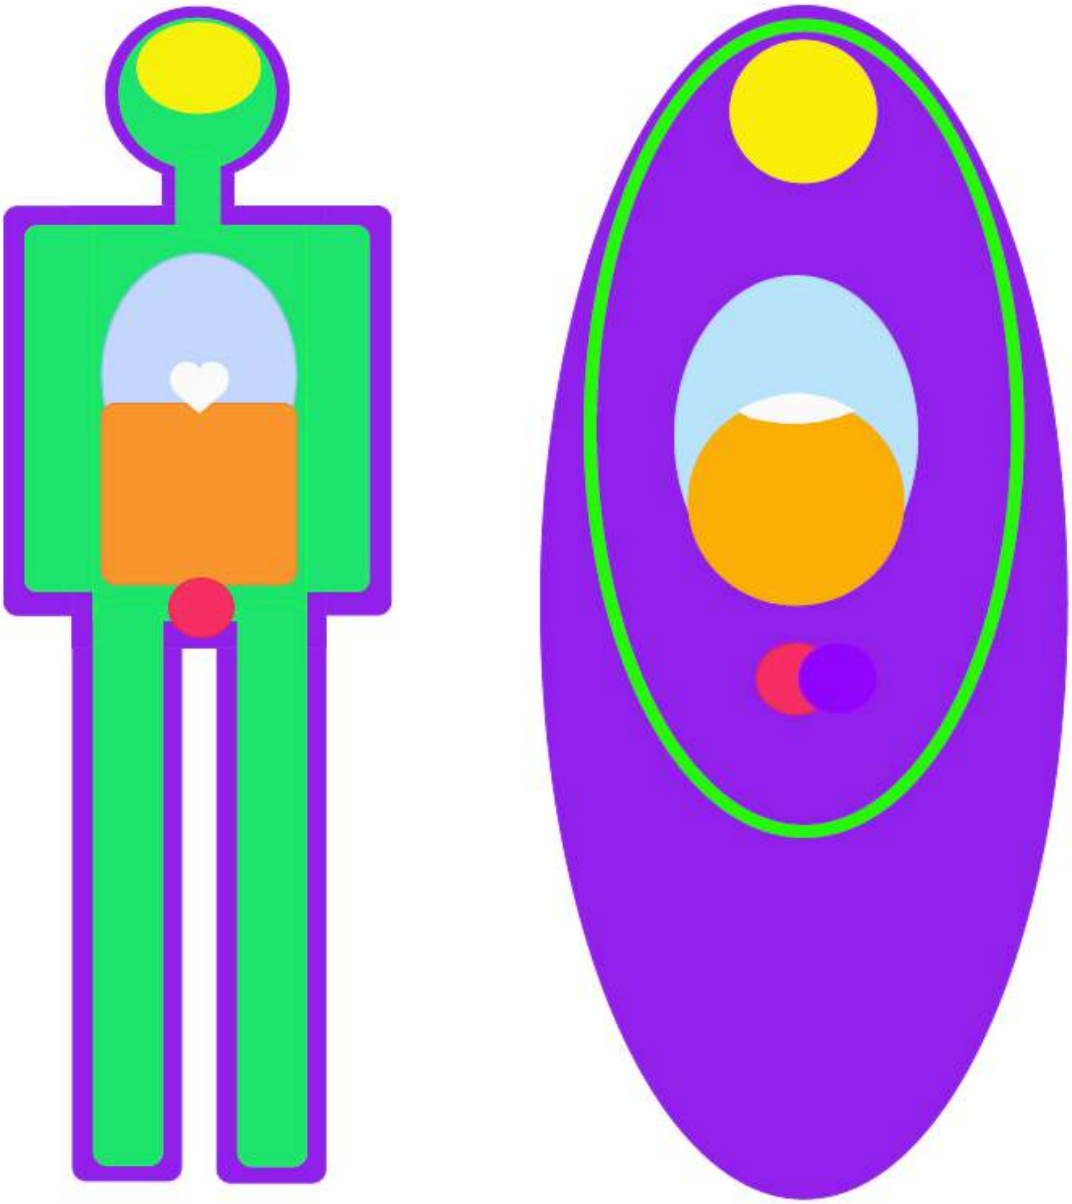

ECTODERM:

The Sun creates our Central Nervous System (By the interaction with the light/warm effect and the "interesting" rich life production resulting from it)

Space creates our skin (By the cold it carries. The skin stock the energy/fat to protect against cold)

It is remarkable to observe that even the structure of our body reflects the structure of the ecosystem we are living in.

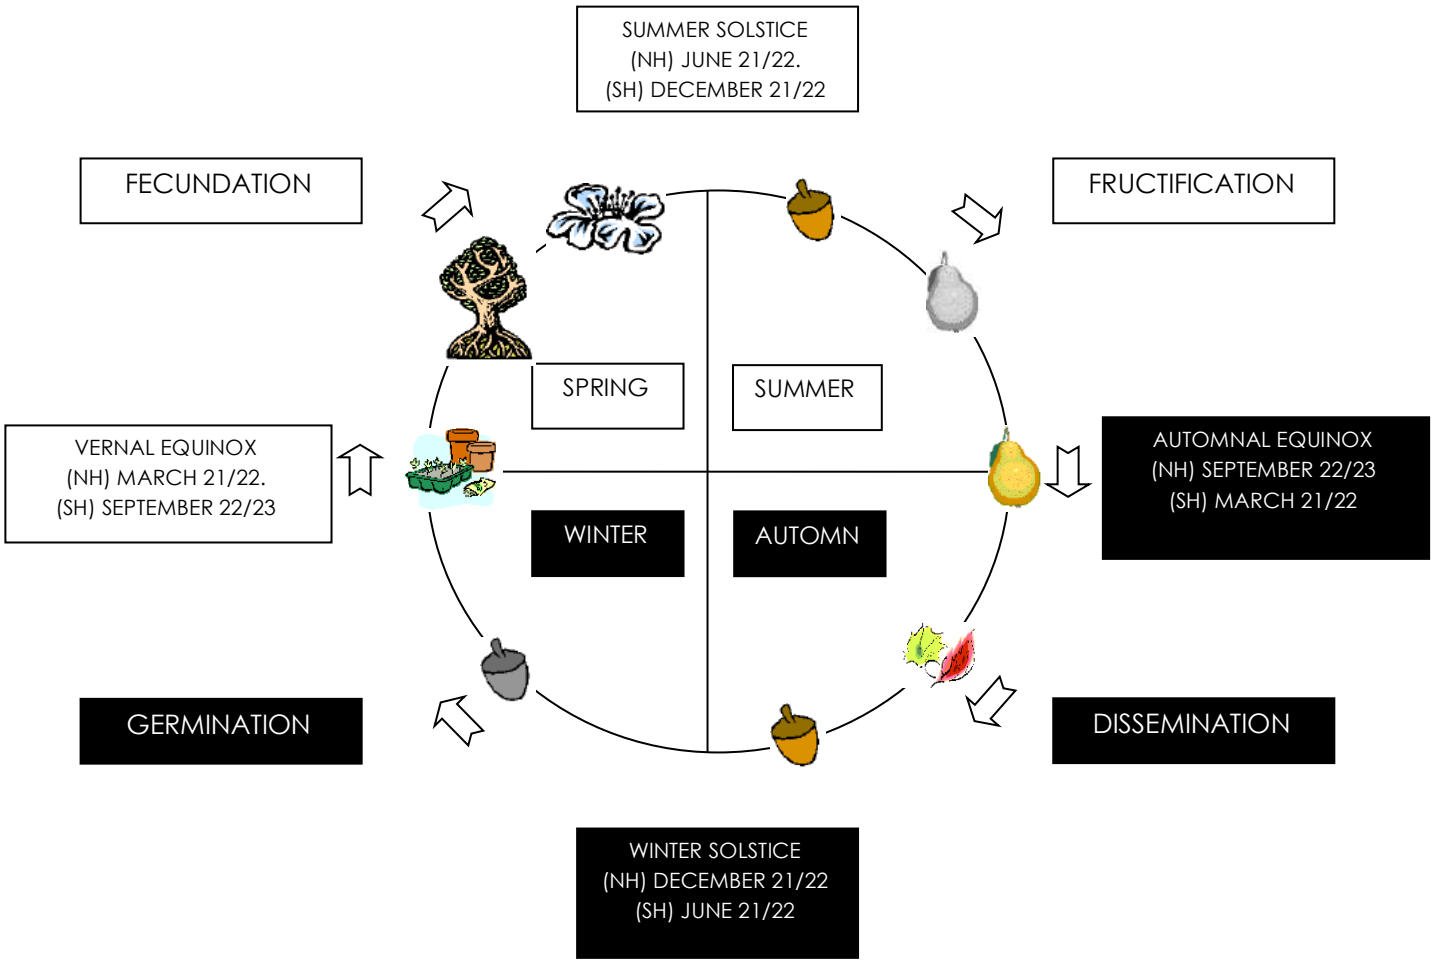

Sun		⇨		Central Nervous System
Gravity		⇨		Musculoskeletal System
Atmosphere		⇨		Respiratory System
Oceans		⇨		Cardiovascular and Lymphatic Systems
Earth		⇨		Digestive System
Moon		⇨		Uro-genital System
Space		⇨		Integumentary System

GENESIS 1:27 So God created man in his own image, in the image of God he created him; male and female he created them.

The combination of the different cycles of activity of the elements constituting our eco-system, creates major cycles: **THE CYCLE OF FOOD PRODUCTION AND ITS ADAPTATION FOR THE CYCLE OF LIFE/REPRODUCTION**.

Dates are for the North Hemisphere (NH)… and are inverted in the South Hemisphere (SH)

Billions of years of adaptation to this cycle has specialized each system of our organism for the particular phase during which they have to be the most involved:

The Respiratory System for spring when the air is at its maxima of oxygen.

The Musculoskeletal System for the summer solstice when searches for mate is at its maximum.

The Central Nervous System for summer while the production activity is at its maximum and the harvest of food begins.

The Digestive System during autumn where most of the food has been produced and ready to be consumed.

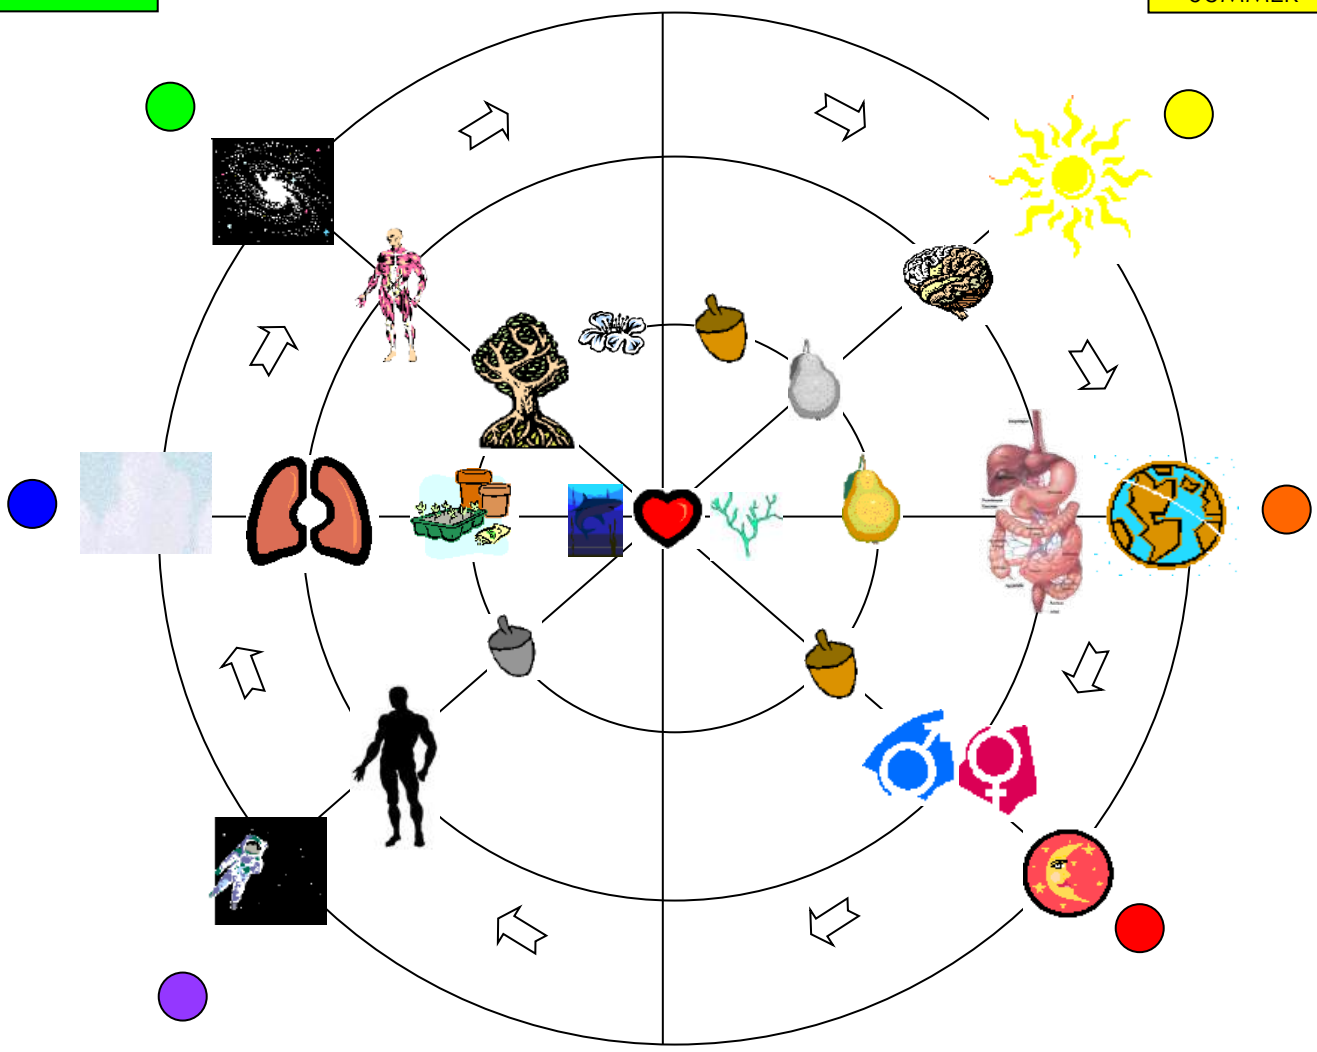

The Uro-genital System during the winter solstice when it is the safest season to carry and deliver a baby.

The Integumentary (Skin) system during winter when it is the coldest and resting season and when the skin collects all its fat.

PRODUCTION / FOOD

SPRING

SUMMER

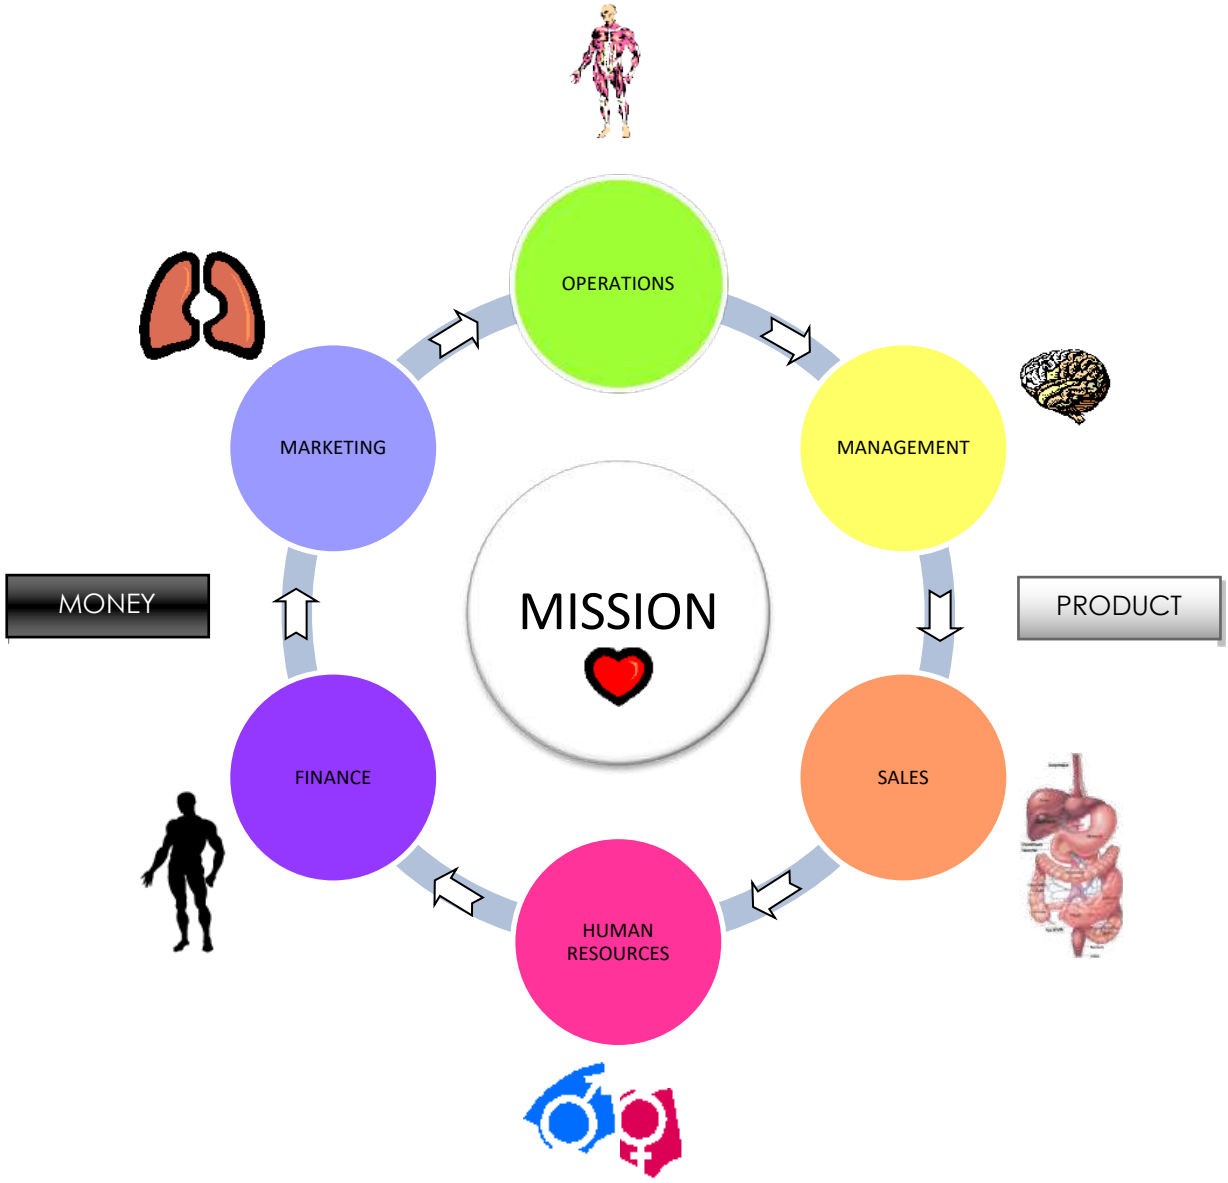

WINTER

AUTUMN

REPRODUCTION / LIFE

Human companies who look for expansion cycles and qualities of their product and services, are following this amazing model of organization, as well.

The Marketing Department finds the Market and the perfect product/service needed (as the Respiratory System locates the position of fruit trees blooming by smell).

The Operations Department manufactures the product/service (as the Muscular Skeletal System reach the fruit trees).

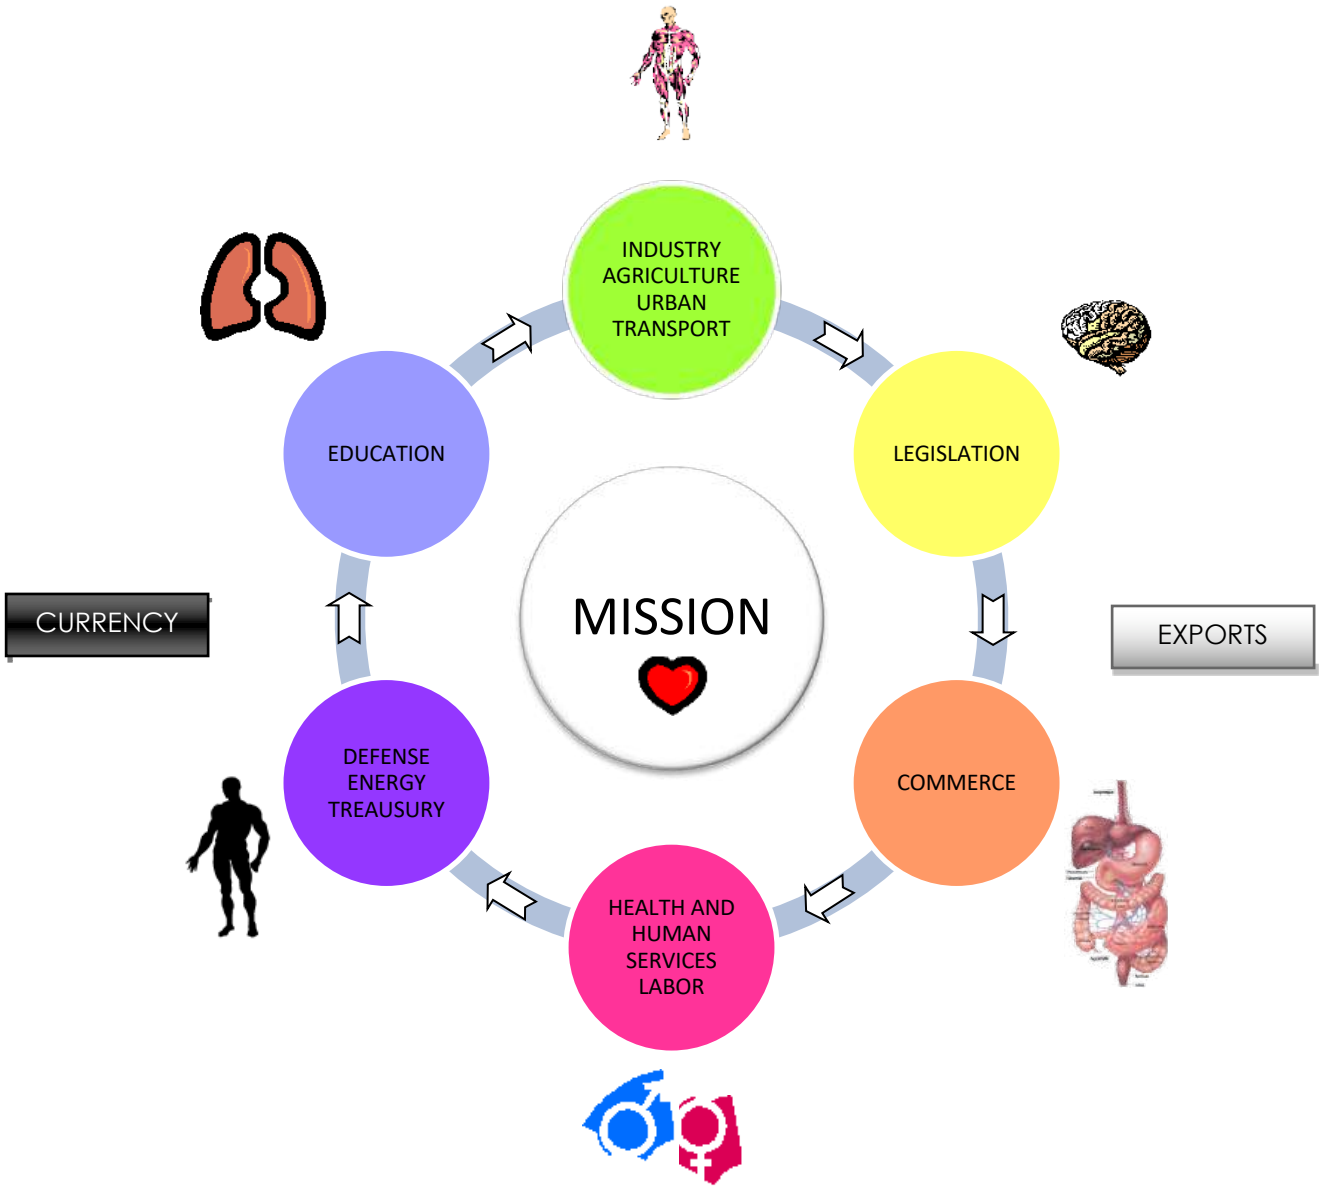

The Management Department manages the production of the product/service (as the Central Nervous System directing the collection of fruits at maturation).

The Sales Department transforms the product/service into money (as the Digestive System transforms the fruits into energy).

The Human Resources Department recruits and pays the employees (as the Uro-genital System brings more individuals to the group and restores the body). The rest of the money not used, goes to the Finance Department (as the extra energy not used by the production and reproduction processes, is stocked by the Integumentary System and ready for the next cycle of expansion as fast as possible).

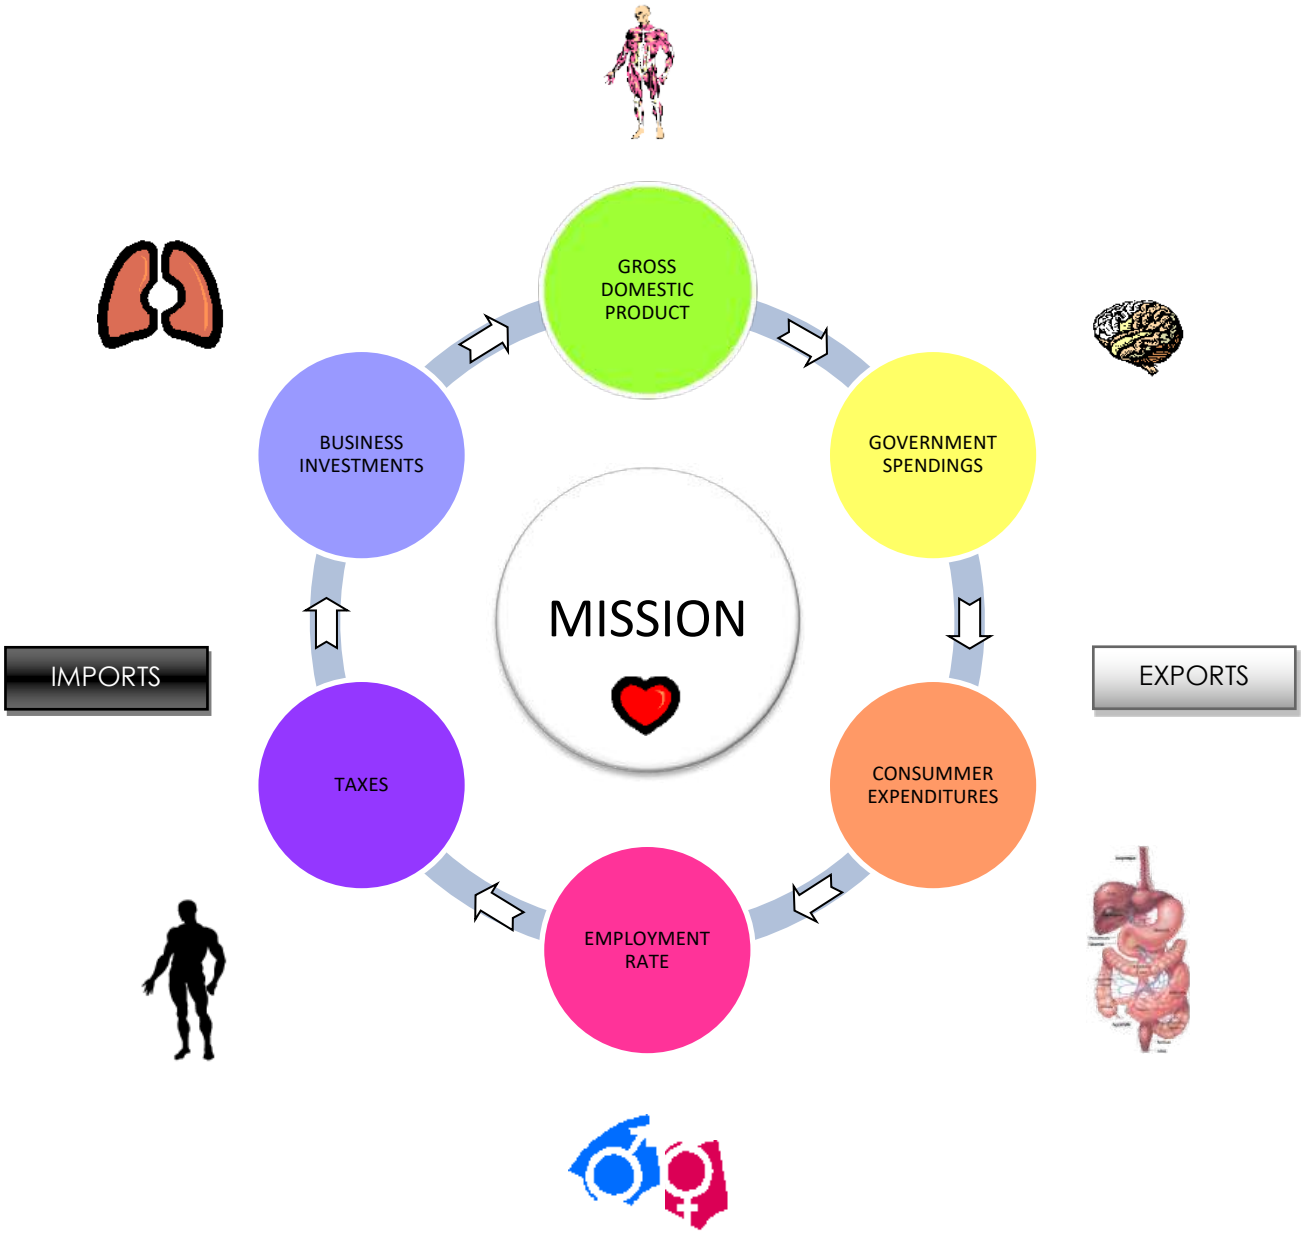

The Finance Department collects the money and makes it available to invest (as the Integumentary System collects and stock the fat/energy).

We could easily imagine this model as the basis of a modern democratic republic government.

The center/middle of this model could be the mission of the country and the President and Vice-President who carries it.

Could we expect to find the same model of organizations in the Macroeconomics of a Country?

The center of this model could be the currency international value of the country and the department that maintains it.

Mastering Space, DNA and LIFE

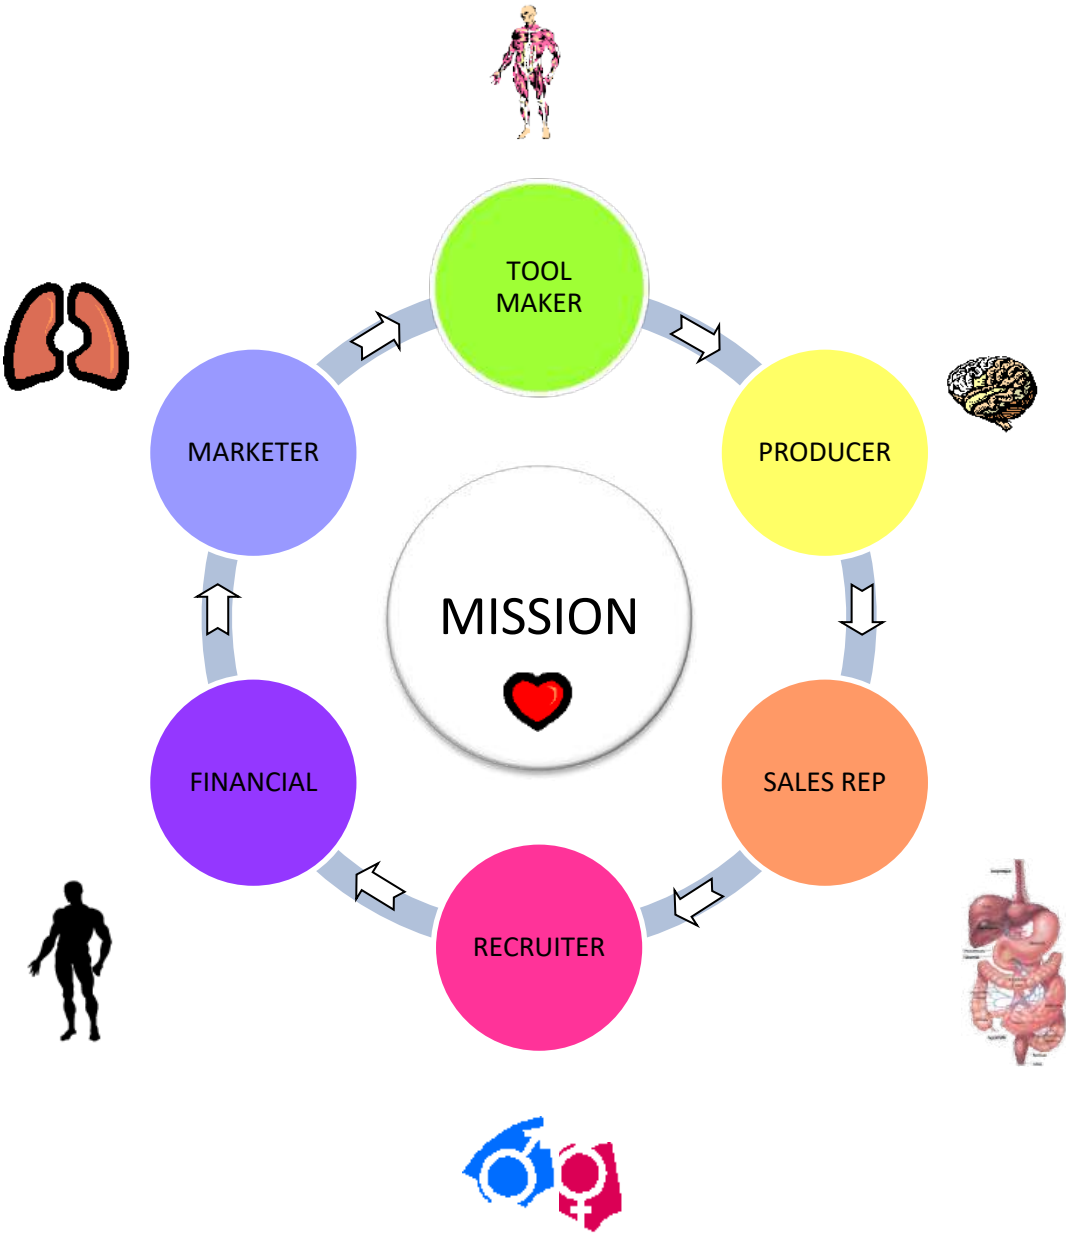

THE BEAUTIFUL BODY

A Beautiful Paradise for everyone and everyone creating her/his Beautiful Paradise

Could Humanity species function as ONE organization with roles distributed… spontaneously?

The ultimate purpose of this Model of organization is to achieve the mission of: **MAINTAINING LIFE**.

The mission to be successful, requires having a certain number of **Partners (7)** where each one has a specific task to accomplish, and plays a specific role when time comes (**A Financial, a Marketer, a Tool Maker, a Producer, a Sales Person, a Recruiter and a Founder**). All of these partners have an equal value and take their own place, at the right time to perform their specific role in order to reach successfully the common goal.

The center of this system represents the Mission and the Founder of the organization (the heart/axis/goal of the organization).

Could Humanity species use the same model of organization than the human body and most of life on earth?

Humanity adapted **in only 60,000 years**, everywhere on the planet and **evolved specifically its DNA to fit the geophysical specificity of their new continental habitats.**

6 continents and 1 sub-continent welcomed and **adapted the DNA of the 7 specific type of bodies of Humanity to the specificity of their ecosystem**.

6 continents and 1 sub-continent designed the 7 distinct races/vehicles/bodies/functions/systems/organs of the Humanity organism of today.

NORTH AMERICA

EUROPA

ASIA

SOUTH AMERICA

AFRICA

AUSTRALIA

INDIA

If we observe the global economy today, we could see a tendency for specialization (a specific mission) of the different continents:

NORTH AMERICA: SKIN / SPACE

Finances and Protection. The United States has vast economic, political, and military influence on a global scale and the most powerful army in the world. Its influence into the global economy, world entertainment, internet communication, the world peace, among others, make the United States the most powerful leading nation impacting all lives on the planet. Imagine if North America could become the biggest **FINANCER and PROTECTOR** of Humanity.

EUROPA: LUNGS / ATMOSPHERE

Marketing (new products, new markets) and Education. Europe, has developed through its rich and diverse historical past, a sense of creativity that leads to a constant source of INSPIRATION, new innovative products and services for the planet. Imagine for one instant if Europe could become the biggest **MARKETER AND EDUCATOR** of Humanity.

ASIA: SUSTAINING SYSTEM / GRAVITY

Manufacturing and Tool Making. Asia is the continent that proved having the sense of manufacturing by attracting most of the production activities of the Globe. Imagine for one instant if Asia could become the biggest **MANUFACTURER and TOOL MAKER** of Humanity.

SOUTH AMERICA: BRAIN / SUN

Management and Productivity. South America is the richest continent (with Africa) on the planet, with natural resources in Gold, Silver, Oil and stones. It is also the birth place of the Olmecs civilization with extraordinary knowledge of astronomy, agriculture, sophisticated smart cities development and a precise calendar system, managing huge populations. Imagine one instant if South America could become the biggest **MANAGER and PRODUCER** of goods and services of Humanity, with its BRICS associates including India, Russia, China, and South Africa.

AFRICA: DIGESTIF / EARTH

Sales, Consumption, Natural resources (trading market). Although being one of the two richest continents with natural resources, Africa remains the world's poorest and most underdeveloped continent, due largely to the effects of the slave trade, corrupt governments, failed central planning, widespread human rights violations, the negative effects of colonialism, despotism, genocides, and conflict. Africa could become the biggest **CONSUMMER AND TRADING MARKET** of Humanity… with its number one Sales persons.

AUSTRALIA: URO-GENITAL / MOON

International Medical Aid and Human Resources. Australia has energetically pursued the cause of international trade liberalization. Australia led the formation of the Cairns Group and APEC, and is a member of the OECD and the WTO. Australia is a founding member of the United Nations, and maintains an international aid program under which some 60 countries receive assistance. Imagine for one instant if Australia could become the biggest **RESOURCER and DOCTOR** specialist of Humanity, defining international Aid and trade processes and helping **orientate** humanity cell (each human) to become what they were designed/destined/born to be.

INDIA: HEART / OCEANS

Information technology services and connectivity. The world's largest democracy, India is a federal republic with 29 relatively autonomous states and seven union territories. English is the most important language for national, political and commercial communication. India has a fast-growing, diverse economy with a large, skilled workforce. Although agriculture employs the most workers, services are the major source of economic growth. Due to its educated, English-speaking workforce, India has become an important center of information technology services, business outsourcing services and software workers, the biggest **INFORMATOR and CONNECTOR** of Humanity.

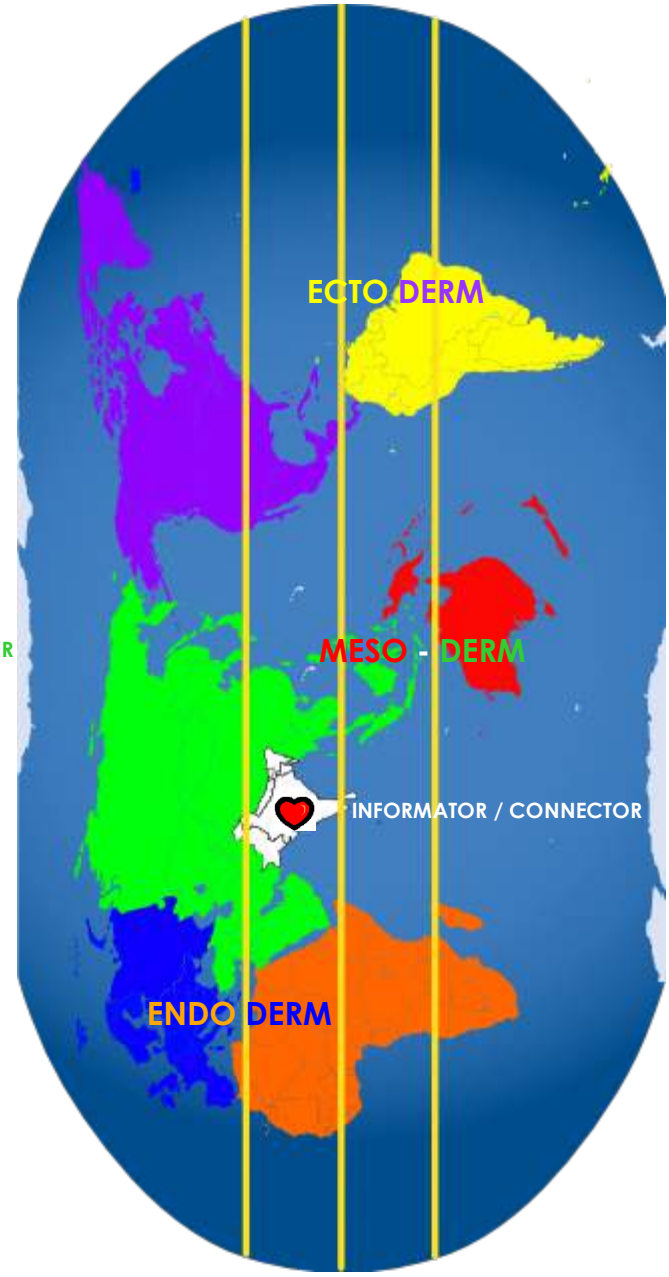

FINANCER / PROTECTOR

MANUFACTURER / TOOL MAKER

MARKETER / EDUCATOR

PRODUCER / MANAGER

RESOURCER / DOCTOR

CONSUMMER / TRADER

ONE GOAL: PARADISE ON EARTH

The source of creation and the creation have given Humanity, individually and as a species, free access to a home planet with all its continents and oceans, free access to clean water, free access to clean air, free access to natural shelters, free access to food with freedom to immediately eliminate body wastes when needed, free access to Sun exposure for the skin to create vitamin D, free access to nudity to facilitate mate choice and conceive stronger future generations, free access to medicinal plants to cure diseases, free right to be part of Humanity and to be respected, freedom to adore, and freedom to develop natural born talents to serve Humanity as a whole and for the generations to come.

The source of creation and the creation have given Humanity along with all other species, a **BEAUTIFUL PARADISE ON EARTH**.

Humanity is a sexual species with a natural sex ratio close to 1:1.

Having 50% of potential mothers and 50% of potential fathers is the best condition to find mates and conceive more adapted future generations of Humanity.

This fact shows that Humanity, is one as a species, is regulating the sex of every birth while accounting for every death, and that every birth is necessary for Humanity to strive.

Humanity started its journey on Earth in Africa.

The Khoe-Sān Bushmen People of southern Africa alive today, are the direct descendants of the first evolved *Homo sapiens* who ever lived in Africa over 300,000 years ago.

Sometime between 195,000 and 123,000 years ago, African *Homo sapiens* population diminished considerably, affected by a glaciation and dry climate period that left much of the land uninhabitable.

All humans on Earth living today, are the descendants of the Central African population who survived this period.

All Women living today, carry the mitochondrial DNA marker of the mitochondrial Eve, the common original African Mother, **THE DNA EVE**, who lived around 160,000 ago in Africa.

All Men living today, carry the DNA marker of the Y chromosome Adam, the common original African Father, **THE DNA ADAM**, who lived over 100,000 years ago.

The African Diaspora carrying the common father and mother DNA, started around 60,000 year ago, transforming the remaining estimated 2,000 humans still alive in Central Africa, into the big family of 7.9 billion humans alive worldwide today.

It took only around 3,000 generations, mutating DNA twice per generation, to adapt to the other continents of the Planet, and to become today's diverse Humanity Family, One Family Tree, One Humanity.

The key of this drastic transformation was successful and fast DNA adaptation resulting from smart and healthy choices made along the journey.

Khoe-Sān Bushmen People's traditional and successful way of life today, identical through the ages, shows us the healthy components of this success, based on egalitarian family social structure with big family groups; respect, equality and kindness among genders; early engagement without sex until menstruation; marriage arranged between families in consultation with elders within their family groups; freedom to divorce; monogamy; decision-making and child raising with Men and Women consensus; no formal authority figure or chief; respect of expertise; arguments resolved by discussions until agreement; belief in the incarnation of the spirit and one blessing higher power; strong work ethic; extensive knowledge of nature, fauna and medicinal plants; systematic transmission of knowledge to next generations; leisure activities and happy conversations; equal sharing of food, water and tools; prohibition of adultery, incest and interbreeding within the same family; cultivation of strong relationship ties; art creation and dance; and nomadic explorations needing constant adaptation, with Man specializing on hunting and Woman on building shelters, and gathering edible wild plants, roots, tubers, honey, fruits, seeds and medicinal plants. But as well with a systematic and traditional DNA selection ruled by giving death to adultery individuals and newborn with disabilities.

This natural democratic republic family-based organization, where the group functions as one and make decisions together after reaching consensus, and reject unhealthy individuals for the Family, made the best DNA choices for a perfect and fast adaptation.

Most of these principles are the inherited foundation of our modern societies today, and a solid basis for their expansion.

Each human alive is composed of two parts. A Timeless energetic spirit with no name or gender, who does not age, (the spirit we talk to when we talk to ourselves or each other and remember everything it experiences), and a named Temporal physical emotional body who age and pass. The spirit is here to purify, evolve and use the body to gain energy by making the right emotional choices while interacting with the creation. By principal, everything a spirit do to other spirits, it does it to its own. Serving the creation with love enrich our spirit, destroying the creation with hate destroy our spirit. In another word, spreading positive energy enrich our energy and unite it with all the creation energy, spreading negative energy impoverish our energy and isolate it from all the creation energy.

The source of creation and its creation are ONE, and provides a complete ecosystem for the energy to unite, like molecule of water are attracted to each other and unite with all the waters of the planet, constantly going back to the source after each weather cycle.

The design and intent of the source of creation and the creation, is for Humanity species to be naturally and organically ONE, and access an ecosystem where every single human alive have a free equal opportunity to unite and strive in Humanity.

The Humanity species as well, has a Spirit and an Emotional Body. The spirit of our species is made of all our individual spirits in a vast collective unconscious communication network uniting all of us. The emotional body of Humanity is composed of all our individual emotional state sharing and functioning

as Humanity Cells, where every cell has a unique specific necessary role in influencing the entire emotional body of Humanity and slowing down or accelerating the reproduction of the species.

In another word, every single human being alive has an organic unique role to play for our species and is necessary to exist. Destroying one Humanity Cell alive, is destroying a part of Humanity Emotional Body. It is a crime against Humanity.

It is vital for Humanity to systematically discover, orientate and encourage each Humanity Cell to pursue its specific unique talents and its emotional adoration performing them.

WE ARE ALL CELLS OF THE HUMANITY BODY, ALL BORN WITH A SPECIAL FUNCTION, UNIQUE AND NECESSARY TO THE LIFE OF THE ENTIRE BODY.

We are therefore all related and are ONE BIG FAMILY… ONE HUMANITY FAMILY TREE.

Life organizes itself to survive by following a precise model of organization. It is when everyone has a precise role to play and work TOGETHER with the whole community than life as the best chance to sustain itself.

Humanity is following the same model. It is **an organism**, the Humanity body, a sexual species who self-regulate (half mothers and half fathers to have the best chances to reproduce) where each humanity cell (humans) has a specific role to play for the eternal survival of the whole organism.

When life is hard, and conflicts are high, Humanity respond **by slowing down reproduction**, organically augmenting **same sex partnership** and **diminishing fertility**. At the contrary **when life is easy**, Humanity respond by **augmenting reproduction** and **fertility** rate organically.

The 6 continents and 1 sub-continent, (7 partners of equal value and importance), are all contributing to the eternal survival of Human life, depending on WATER, on land and in the OCEANS, ARCTICA AND ANTARCTICA.

About 98% of Antarctica is covered by the Antarctic ice sheet, a sheet of ice averaging at least 1.6 km (1.0 mi) thick. The continent has approximately 90% of the world's ice (and thereby approximately **70% of the world's fresh water**). If all of this ice melted, sea levels would rise about 200 feet (60 m).

SLOWING DOWN GLOBAL WARMING AND PRESERVING WATER should be our constant priority considering that approximately 60% of an adult human body is made of water.

WATER CREATES LIFE, LOVE AND SPIRIT

IT IS THE BLOOD OF GOD

H2O is the base of all lives (plants, animals, humans of all planets) in the Uni-Multiverse, while electromagnetic energy is the base of all spirits (plants, animals, humans of all planets).

EVERYONE EXPERIENCES THAT IMMERSING OUR BODY IN WATER GIVES US CREATIVE THOUGHTS AND CONNECTIVITY TO THE CREATIVE SOURCE OF THE UNI-MULTIVERSE… GOD AND ITS KNOWLEDGE.

WATER IS ALSO OUR FOOD AS SUGAR IS A WAY TO STOCK WATER. GLUCOSE = C6H12O6, IN ANOTHER WORD, SIX ATOMS OF CARBON HOLDING TOGETHER SIX MOLECULES OF WATER… EASILY STOCKED IN OUR FAT.

Even if a global warming is a natural occurrence, as we are at our fifth interglacial period called the Holocene that has lasted nearly 11,000 years and was expected to end, it has been delayed for at least another 150,000 years, due to the combustion of fossil fuels, the extensive deforestation, and 80% of agriculture and drinkable water reserves used to feed livestock instead of feeding humans with the frugivorous diet we were designed genetically to have.

If we do not change our energy sources and our diet, replacing corn fields to feed livestock by fruits trees fields to feed Humanity, we are going to experience tremendous geological and climatic changes with their destructive impact on life. We already started to see the catastrophic effects of these changes.

Therefore, it is an incredible opportunity for the nations of the world to unite against this threat and pursue our common goal of expansion and survival.

Our adaptation on the 6 continents and 1 subcontinent, made us all unique and complimentary.

Each individual on this planet is born with a unique mission in the same way each cell of our body is born with a special function. The size of the mission is not important… the mission is.

Educating our young is not enough. We need to **ORIENTATE** them by revealing the particular mission they **ADORE**, and help them achieve it through proper individualized education.

The ultimate goal of all is the pursuit of happiness by **BECOMING ONE TOGETHER**, and **making Earth a BEAUTIFUL PARADISE FOR ALL.**

Every single mission on this Earth has for objective to give Joy and Happiness.

Carrying our mission is rewarded by the **HAPPINESS and JOY of the SPIRITS** we touch and consequently by the **PURIFICATION** of our own spirit/soul.

IT IS THE PURPOSE OF LIFE TO PURIFY OUR SOUL BY CHOOSING TO SPREAD JOY AND LEAVING BEHIND A BEAUTIFUL PARADISE ON EARTH FOR ALL THE SPIRITS TO COME, HAVING THE DIVINE BLESSING OF AN OPPORTUNITY TO PURIFY THEIR SOUL TOO. WE NEED A HEART TO PURIFY OUR SOUL, WHEN OUR HEART IS NO MORE OUR SOUL IS FINALIZED AND CANNOT PURIFY ANYMORE.

THE ULTIMATE SOLUTION OF HEALTH, WEALTH AND HAPPINESS: THE ADORING TREE

"Then God said, "I give you every seed-bearing plant on the face of the whole Earth and every tree that has fruit with seed in it. They will be yours for food."

Genesis 1:29-30

Like the fruit tree, born from a seed designed/destined to be the specific tree making the particular fruit of its species, each human is born to become a specific productive being.

52 Million years ago, trees were packed in dense forests that could not expand anymore. They found the way to spread their seeds by enrobing them with sugar and cover the newly created fruits with a skin color coded to advertise maturity and feed the animals who in return carried their seeds away, **MAKING US FRUGIVOROUS IN THE PROCESS.**

Like the fruit trees giving with **ADORATION/UNCONDITIONAL LOVE**, their fruits to the animals who will eat them, and in return, carry the seeds to a better soil… humans work to give their services and products searching for the ADORATION of their clients who in return, will advertise them and their brand, and inspire new generations to continue their productive legacy.

THE MOTIVATION TO DO SO IS ADORATION. WE ARE ALIVE AND INCARNATED FOR OUR SPRITS TO LEARN HOW TO ADORE. EVERYONE BORN ON THIS EARTH IS ABSOLUTELY NECESSARY AND NEEDS TO BE ADORED.

IT IS THE ROLE OF THE POWERFUL PEOPLE OF THIS WORLD, TO ADORE THE LESS ADORED BY HUMANITY AND TEACH HOW TO SPREAD ADORATION IN A PRACTICAL WAY:

BY ORIENTATING OUR YOUNGS TO BECOME WHAT THEY WERE BORN TO BE, WE WILL HAVE A HUMANITY OF GENIUSES IN THEIR DOMAIN OF EXPERTISE WHO ADORE THEIR CLIENTS WITH ADORABLE PRODUCTS AND SERVICES.

When we do what we ADORE in Life, we become A GENIUS at what we do.

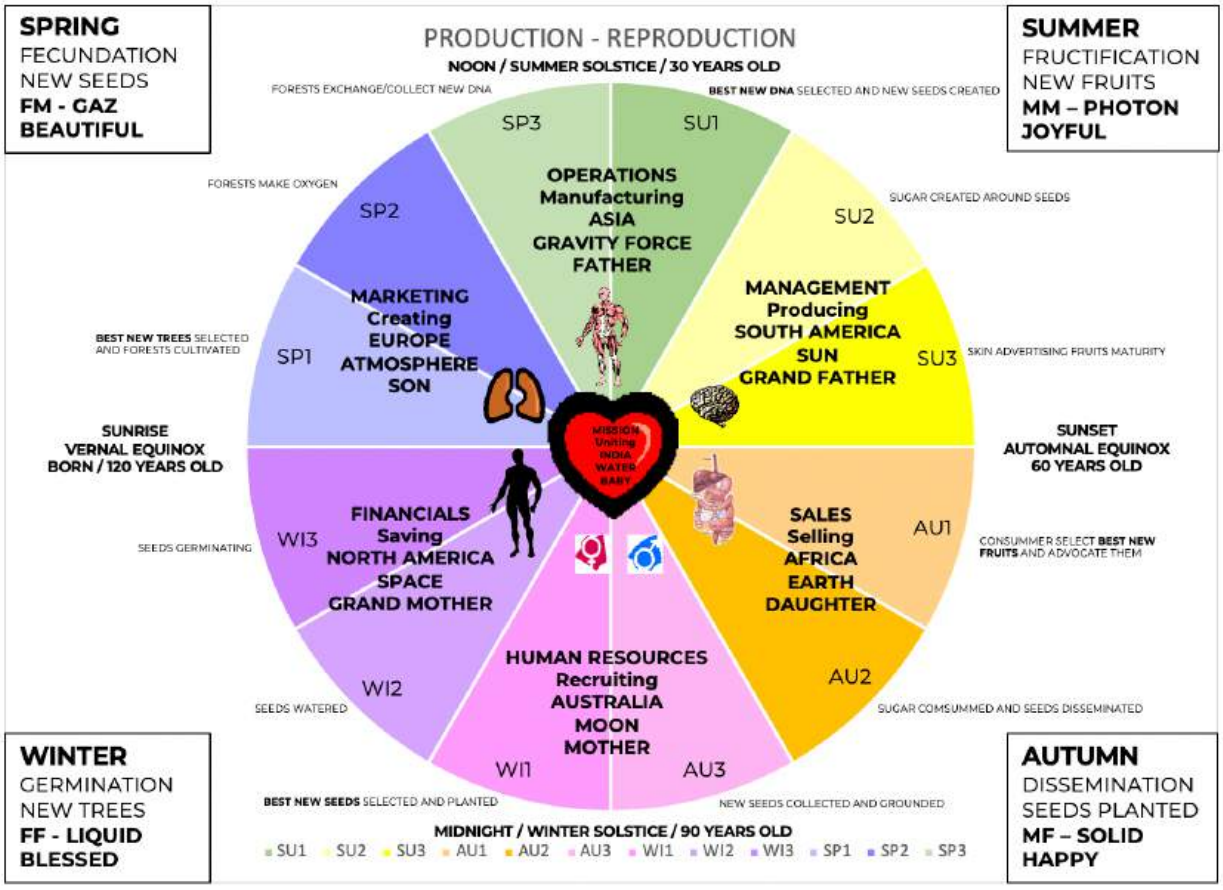

Imagine a World full of GENIUSES offering services and products, fruits of what they ADORE.

IT WOULD BE A BEAUTIFUL PARADISE ON EARTH FULL OF STARS WITH THE COMMON GOALS OF BEING ONE TOGETHER STRONG AND BRINGING BACK A BEAUTIFUL PARADISE ON EARTH.

ORIENTATION OF EACH HUMANITY INDIVIDUAL SPIRIT

BASIC INCOMES FOR ALL

THE GROSS DOMESTIC PRODUCT OF THE UNITED STATES
(THE AMOUNT OF ALL INCOMES GENERATED IN THE
COUNTRY FROM THE SALES OF GOODS AND SERVICES)
WAS 23.32 TRILLION USD IN 2021
AND THE USA POPULATION WAS 332 MILLION
IF EACH USA LEGAL RESIDENT HAD RECEIVED
2,000 USD PER MONTH IN 2021
THE TOTAL COST WOULD HAVE BEEN
7.968 TRILLION USD
SO 34.6% OF THE USA ANNUAL GDP THAT YEAR
IF EACH USA SALE OF GOODS AND SERVICES HAD GIVEN BACK
THAT 34.6% OF INCOME TO EVERY USA LEGAL RESIDENT
THAT MONEY WILL HAVE CIRCLED BACK TO THE USA GDP
THROUGH CONSUMPTION CREATING JOBS,

FRUSTRATION, HOMELESSNESS AND CRIMINALITY

THE ENERGETIC POWER OF THE SOUL

The energetic power of the soul transitions the concept from an abstract philosophical idea into a dynamic, radiating reality. If the soul is our core spark, its **energetic power is the frequency, field, and ripple effect it creates in every moment of existence.**

The Toroidal Energy Field.

The Torus and the Radiating Field

Energetically, the soul does not sit quietly inside the physical body; it projects an active, measurable field. The human **heart generates** a powerful, donut-shaped **electromagnetic field** (a **torus**) extending **several feet outside the body.**

In spiritual terms, this is the canvas of the soul. It is a continuous feedback loop:

- **The Radiating Frequency:** The thoughts, intentions, and core emotions we choose act as a **broadcasting tower**, coloring this entire energetic field.

- **The Magnetism of Intent:** What we hold within our energetic field dictates what we align with, draw in, or repel in our daily lives.

Resonance and the "Echo" Effect

Energy is never static; it operates on the principle of resonance. When a soul intentionally directs its focus, **it alters the energetic vibration of the environment around it.**

Principle	Energetic Mechanism	Real-World Impact
Vibrational Alignment	Like **frequencies naturally attract and reinforce one another.**	Elevating your own emotional state automatically shifts the room's atmosphere.
The Conservation of Emotion	Positive, high-frequency energy (like unconditional love or deep compassion) isn't lost when a moment ends.	It deposits into a timeless "collective well," an enduring energetic legacy felt back home.
Free Will as a Governor	**Conscious choice alters your personal frequency instantly.**	Breaking a cycle of reactivity immediately shifts the energetic pattern of an interaction.

Cultivating the Soul's Energy

Because the soul's energetic power is tied to our choices, we hold **the ability to deliberately expand and clear our field.**

- **The Primary Alignment:** Treating others with a profound, **soul-level care creates a high-frequency resonance.** It acts as an energetic shield, lifting both the sender and the receiver.
- **Conscious Choice over Instinct:** Every time free will is used to **choose peace, understanding, or patience over automated**, negative reactions, **the energetic field expands and stabilizes.**

"Energy cannot be created or destroyed, it can only be changed from one form to another."

Albert Einstein
